PROTECTWELL

PTW-1000TE-D
Firemen Alarm Control Panel, Desktop Version

Description

The PTW-1000TE-D firemen alarm control panel (host) can be placed on the desktop or hung on the wall. It adopts a DC24V power supply, the bus distance can reach 3000 meters, and the number of allocated addresses can reach 255, covering a wide area. There is a text description function in the terminal device, which can be used to understand the location of the device in a portable manner. It adopts two bus communication, and the bus integrates three functions of power supply, communication and voice. It also has "One-button call" function for 119 fire-alarm. Its networking function can realize the networking of 32 fire telephone control panels. After the networking, the fire telephone switchboard can realize call transfer and cross-regional call functions to further expand the coverage area.

Feature

- Back-light keyboard.
- Graphical menu.
- Adopts two bus communication.
- Support 255 addresses.
- Obvious answer and hang up buttons.
