

HSNC2-3300

High speed network card, single mode fiber optic

Description:

When multiple PTW2-3300 are networked, each controller must be equipped with an NWC card.

Feature:

- Adopt the international mainstream famous brand MUC.
- Stable and high-speed intelligent communication protocol.
- With a variety of LED status indicators.
- Plug-in slot installation, simple and convenient.
- Interface communication status monitoring.
- Supports class A or class B wiring.
- Single-mode optical fiber networking.
- The optical fiber interface is of the SC-SC specification.
- Supports 100Mbps bandwidth.
- Interface communication fault dry contact.
- 252 network nodes can be networked.
