

PDG-EM-AIO-IX

Gateway interface expansion card, RS232/RS485

Description:

It needs to be used with PDG-EM-AIO, and provides RS232 and RS485 interfaces with multiple Modbus protocols.

Feature:

- Stable and high-speed intelligent communication protocol.
- With a variety of LED status indicators.
- Plug-in slot installation, simple and convenient.
- Interface communication status monitoring.
- A maximum of four communication ports are supported.
- The BMS interface adopts the international standard Modbus protocol (RTU).
- Two independent RS485 ports.
- Two customizable RS485 or RS232 interfaces.
